

Group II, claims 3-7, directed to a magneto-optical recording medium, with an intermediate layer for adjusting magnetostatic coupling force.

Applicant elects Group I, with the following traverse:

As previously noted, claims 3-7 are directed to an embodiment in which coupling between the readout and recording layers is by magnetostatic coupling, which is brought about by a "magnetostatic coupler" which interferes with exchange coupling between the layers. This "layer" which interferes with exchange coupling may be simply a collection of impurities at the interface of the recording and readout layers. This interfering layer is not the same as the "intermediate magnetic layer" which adjusts a magnetic coupling force between readout and recording layer. In fact, the magneto-optical recording medium of Claim 1 could be used in a magnetostatically coupled device. With this clarification, Applicant agrees with the Restriction Requirement insofar as the magnetostatic coupled medium is a distinct embodiment from the exchange coupled medium.

Reissue Declaration

Applicant submits that the Examiner's remarks with respect to the Reissue Declaration are moot in view of the cancellation of claims 3-7.

Original Letters Patent

Applicant is in the process of obtaining the original Letters Patent, and will submit the original Letters Patent, or a statement as to their loss or inaccessibility, upon indication that all of the pending claims are allowable.

Applicant's undersigned attorney may be reached in our New York office by telephone at (212) 218-2100. All correspondence should continue to be directed to our below listed address.

Respectfully submitted,
